

Product Description

Robot Car Kit Atmega 328p UNO 328 for Arduino Electronics 2WD Intelligent Little Smart Turtle

Features:

- .Brand new Robot Car Kit Atmega 328p UNO 328 for Arduino Electronics 2WD Intelligent Little Smart Turtle
- .Made of high quality material
- .This small robot turtle is based on atmega-328p shingle chip developing system to achieve line-tracking and obstacle-avoiding via infrared photoelectric sensors and Bluetooth remote control to realize intelligent walking
- .Adopt L298N driver module to drive motor
- .Three sets of line-tracking module to detect black line and white line
- .Can be used to anti-fall control
- .Motor Voltage: 1.5-12V
- .Motor Shaft Length: 10mm
- .Allows build it and program it easily with tons of published free codes
- .Open your imagination, enjoy assembling pleasure
- .Great robot turtle assembly kit for Arduino lovers

Specifications:

- .Battery: 2*18650 Battery (**not included**)
- .Material: FR4
- .Color: Black
- .Package Dimension: 260*150*180mm
- .Weight: 899g

Package Included:

- .2 x Metal reducer motor
- .2 x Tyre
- .2 x Motor Fastener
- .2 x Bovine Universal Wheel
- .1 x L298N Motor Driver Board
- .1 x for Arduino UNO328 Control Board
- .1 x for Arduino Sensor Board
- .1 x Holder Kit
- .1 x Steering Gear
- .1 x Ultrasonic Module
- .3 x Line Inductive Module
- .1 x Infrared Receiver Module
- .1 x MCU remote control
- .1 x 18650 Battery Holder
- .1 x 18650 Battery Charger
- .40 x Dupont line
- .6 x Copper Pillar (4 x 35mm / 2 x 10mm)

.Many Screws Kit
